## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hunt (U.S. 3,794,207). Hunt teaches a closure apparatus, shown in figures 1-3, having a cap portion 7 and a handle 16. The cap portion has a top panel is shown at lead line 7 in figure 3. The peripherally depending side wall is element 11 and the radially inwardly extending peripheral lip is element 12. The peripherally depending skirt is the portion of element 11 that extends downwardly from lip 12. the fulcrum portion of the handle is shown at lead line 19.

### *Response to Arguments*

3. Applicant's arguments filed September 24, 2002 have been fully considered but they are not persuasive. Applicant argues that the Hunt closure is not removable. The examiner disagrees with this position. It is the examiner's position that the Hunt closure can be considered "removable" to the degree set forth in the claims because it can be removed from the opening of the container. The Hunt closure is integrally connected to the container through tether 8, however, in the open position it is removed from the container mouth. It has been held that claims in a pending application should be given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974). The patents of Halm et al. (U.S. 4,756,442) and Schoenhard (U.S. 4,703,876) are cited as evidence that the

Art Unit: 3727

term removable can be used to describe closures which are tethered or pivotally attached to containers. Specifically, Halm et al. describes tethered closure 13 as "removable" in col. 1 lines 40-41. Similarly, Schoenhard describes pivoted cap 30 as "removable" in col. 1 lines 25-27. For these reasons, the Hunt closure can be considered removable to the degree set forth in the claims.

### *Conclusion*

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

5. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703)305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into group 3720 will be promptly forwarded to the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Niki M. Eloshway whose telephone number is (703) 308-1606. The examiner is in
